Subject: Well Treatment, Completion, and Workover Fluids Study

Kilty,

Sent an email to Nicole sometime last week on this and have not received a response. Either Nicole or Silvia previously sent me the industry-wide study results from the Well Treatment, Completion, and Workover Fluids conducted by the offshore oil and gas industry that was required in the 2017 EPA GMG290000 Outer Continental Shelf general permit. I have lost the email attaching this study and thought I saved it to my hard drive, but cannot locate it.

Can one of you please resend a PDF of that study.

Thanks and hope you all have a Happy Thanksgiving,

Chris
